CONTENT

With the exception of small items and service parts (such as a temperature sensor), every Mastervolt product is given a serial number containing the production date and hardware revision. The combination of the article and serial number is unique for every separate product. The Mastervolt Serial Number follows a predefined pattern:

YMddZnnnn

Y = Manufacturing Year according to DIN41314, always a letter

M = Manufacturing Month according to DIN41314, can be a letter or a number

dd = Manufacturing Day, always two numbers

Z = Hardware version, always a letter

nnnn = Manufacturing index number, always four numbers
